

Introducing ISO 55001

Maximizing the value of your assets

Increase the life of your assets. **ISO 55001** provides the answer

Benefits of ISO 55001

Improved financial reporting

Significant cost savings

Improved regulatory compliance

Increased resilience and system reliability

An enhanced reputation

Are you getting the best return on investment from the assets in your organization? If you don't proactively manage your assets you risk asset degradation and failure which costs your organization money.

Assets can be tangible or intangible and include everything from IT components and facility equipment to land, property, inventory, and intellectual property.

A growing number of organizations, particularly those with numerous, costly, and potentially aging assets have identified a need to achieve better lifetime value of their assets. Driven by this need, the international standard for asset management, ISO 55001 was created, enabling organizations to optimize the value of assets throughout their lifetime.

A robust asset management system helps make the most of your assets while balancing financial, environmental and social costs, risk, quality of service and performance.

So if you want to save your organization money, optimize your return on investment, and reduce risk, ISO 55001 could be a wise choice.

"ISO 55001 makes the management of our water cycle division future-proof. It reduces risks ranging from unnecessary maintenance to accident prevention."

Hoogheemraadschap Hollands Noorderkwartier,
Dutch water authority

Your **ISO 55001** Journey

Whether you are new to asset management or looking to improve and enhance your current system, we have the right resources and training courses to help you implement ISO 55001. But our support doesn't stop there. We can help make sure your system keeps on delivering the best for your business.

Continually improve and make excellence a habit

Your journey doesn't stop with certification. We can help you to fine-tune your organization so it performs at its best.

- **Celebrate and promote your success** – download and use the BSI Assurance Mark to show you are certified
- Use BSI **Business Improvement Software** to help you manage systems and drive performance
- You may also wish to consider obtaining a copy of the following standards; **ISO 55000 - Terms & Definitions**, and **ISO 55002 - Guidance on implementation**
- Your **BSI Client Manager** will visit you regularly to make sure you remain compliant and support your continual improvement
- Consider **integrating other management system** standards to maximize business benefits.

Why BSI?

BSI has been at the forefront of ISO 55001 since the original asset management specification, PAS 55, was created by us in 2004. And we continue to be at the forefront of developing and evolving the standard to keep organizations resilient and robust. That's why we're best placed to help you understand and benefit from the standard.

At BSI we create excellence by driving the success of our clients through standards. We help organizations to embed resilience, helping them to grow sustainably, adapt to change, and prosper for the long term. We make excellence a habit.

For over a century our experts have been challenging mediocrity and complacency to help embed excellence into the way people and products work. With 80,000 clients in 182 countries, BSI is an organization whose standards inspire excellence across the globe.

Our products and services

We provide a unique combination of complementary products and services, managed through our three business streams; Knowledge, Assurance and Compliance.

Knowledge

The core of our business centres on the knowledge that we create and impart to our clients. In the standards arena we continue to build our reputation as an expert body, bringing together experts from industry to shape standards at local, regional and international levels. In fact, BSI originally created eight of the world's top 10 management system standards.

Assurance

Independent assessment of the conformity of a process or product to a particular standard ensures that our clients perform to a high level of excellence. We train our clients in world-class implementation and auditing techniques to ensure they maximize the benefits of standards.

Compliance

To experience real, long-term benefits, our clients need to ensure ongoing compliance to a regulation, market need or standard so that it becomes an embedded habit. We provide a range of services and differentiated management tools which help facilitate this process.
