

Hardware for Windows and Doors Kitemark

Demonstrate capability and drive customer confidence

The Kitemark has been helping fenestration industry clients to access markets for decades and now hardware suppliers are able to join the Kitemark community.

Whether you're speaking to a window or door manufacturer, demonstrating the quality of your product without relevant test evidence can always be challenging. This is where the Hardware Kitemark for Windows and Doors can help.

What are the benefits of the Hardware Kitemark?

As the fenestration market continues to evolve and diversify, it's becoming increasingly difficult for hardware suppliers to demonstrate their products are in line with industry standards – especially since the introduction of Approved Document Q to the Building Regulations. Provide your prospective customers with peace of mind through third party certification and instant quality assurance with the Kitemark.

Customer satisfaction

Demonstrate clear evidence of meeting the required industry standards including PAS 24 (for enhanced security) and the BS 6375 series (performance of windows and doors).

Win more business

Differentiate your hardware products in a crowded market, with independent third-party certification that carries the BSI Kitemark, the original mark of trust since 1903.

Market Access and clarity of compliance

Ensure your products meet local authority frameworks, PQQ's and best practice – enabling access to more contracts.

Operational resilience

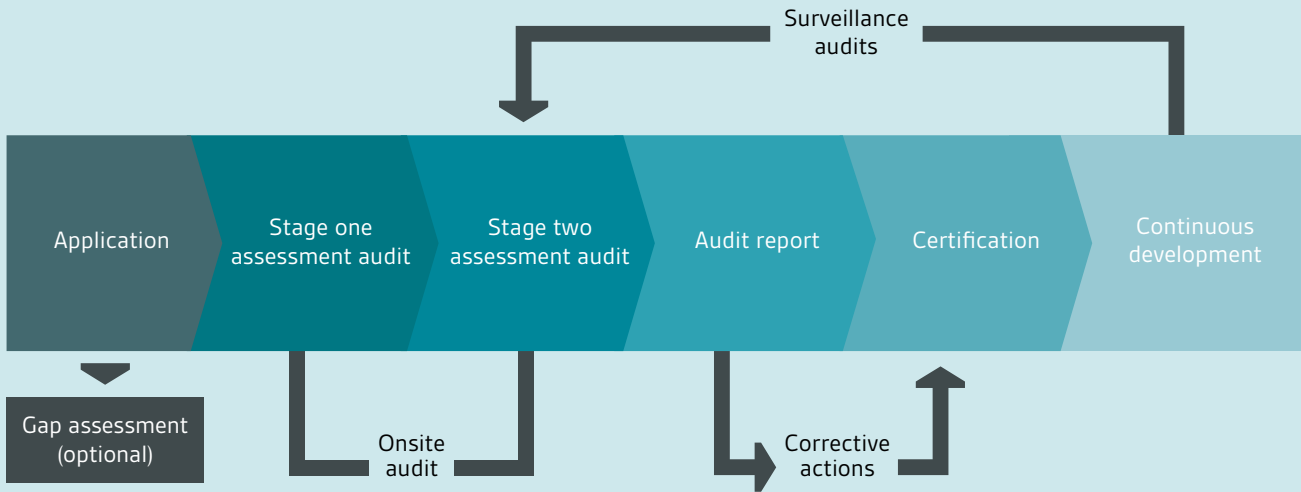

On-going surveillance and testing supports your organization to adapt to change quickly in times of uncertainty and market disruption.

At BSI, we have the experience, the experts and the support services to help you get the most from the Hardware for Windows and Doors Kitemark.

Kitemark certification journey

Whether you're looking to differentiate your products in the market or gain third party recognition of compliance – BSI are here to help. The Hardware for Windows and Doors Kitemark shows that your products have been rigorously tested by our expert team and provides instant confidence to your stakeholders.

“We’ve launched this Kitemark to help hardware suppliers demonstrate that their products have been independently certified against industry standards. Not only will this provide the fenestration supply chain and users of the product with reassurance that the product is safe and reliable – it will enable hardware suppliers to differentiate themselves from other organizations with non-assured products.”

Andy Butterfield, Product Certification Director of Built Environment – BSI

Interested?

BSI is currently looking for companies to become early adopters for this new scheme. Make sure you don't miss this opportunity to be one of the first to take part in gaining the Hardware for Windows and Doorsets Kitemark. Simply get in touch and a member of our team will be happy to talk you through the process.

Why BSI?

For over a century BSI has championed what good looks like and driven best practice in organizations around the world.

As the founder of the Kitemark, we've been at the forefront of fenestration testing and verification. That's why we're best placed to help you gain compliance.

From construction products to asset lifecycle management, we're leading the way in the built environment sector, innovating and collaborating with our clients to build a safer more resilient tomorrow – one that protects our buildings, assets, the environment and most importantly our people.
