E-Learning Supply Chain Training Modules

BSI Supply Chain Services and Solutions provides e-learning C-TPAT Security and Threat Awareness training modules to help organizations develop a better understanding of the C-TPAT Program, the minimum security criteria, and risk assessment requirements and methods. BSI provides three modules covering a range of security topics targeted to the specific audience participating.

All training modules are hosted on BSI's Learning Management System (LMS) and can be accessed remotely. These trainings can be purchased individually or as a group, and include a Certificate of Completion for each participant.
