

# Quality Self-assessment checklist

# How mature is your approach to quality management and Lean Six Sigma?

Today's quality landscape is being shaped by new technologies, hybrid working environments, and continuous methodologies. Internationally recognized standards and frameworks like Quality Management Systems ISO 9001 and Lean Six Sigma have become essential to ensure your quality management processes align with industry best practice.

Together, they can help your organization establish trust, accelerate growth, improve efficiencies, and reduce waste.

Our training and qualifications are designed to ensure that your processes are optimized for operational excellence. Our experts will provide you and your teams with the knowledge and skills needed to establish a culture of continuous improvement that mitigates risks and drives ongoing improvements.

Complete the assessment below to discover your unique maturity score in both quality management and Lean Six Sigma. At the end of each section, you'll receive tailored recommendations on the training and qualifications that will help you drive improvement in quality, trust, sustainability, and operational excellence at every stage.

# Your quality management self-assessment checklist

A Quality Management System (QMS) based on ISO 9001 empowers organizations to deliver consistent, reliable, and long-term excellence. They provide organizations with the framework of policies, processes, and procedures needed to create a culture of continuous improvement that builds trust.

	Yes	No
<b>1</b> I understand the basic principles of quality management and what it aims to achieve.	<input type="checkbox"/>	<input type="checkbox"/>
<b>2</b> We have a QMS in place, but it is not in line with ISO 9001 requirements.	<input type="checkbox"/>	<input type="checkbox"/>
<b>3</b> There is at least one individual within my organization who could be described as a subject matter expert for quality management.	<input type="checkbox"/>	<input type="checkbox"/>
<b>4</b> There are advocates at an executive level who understand the principles of quality management and are willing to commit time and budget to its implementation.	<input type="checkbox"/>	<input type="checkbox"/>
<b>5</b> We have formally identified our customer's current and future needs, such as desire for hyper-personalized or eco-friendly products. We have also put in place processes to measure, monitor, and interpret customer feedback.	<input type="checkbox"/>	<input type="checkbox"/>

12

I have the confidence to lead and manage a team of internal auditors. I am also able to effectively build relationships with stakeholders by managing processes that comply with the latest requirements and regulations.

13

We have invested in interoperable IT solutions and established digital quality ecosystems to streamline product development, enhance risk management, and improve testing processes.

14

We are constantly adapting our wider quality management strategies to meet customer needs, thereby fostering a culture of continuous development and excellence.

15

We have seen demonstrable evidence that our quality management strategy is improving customer satisfaction, market access, and employee engagement.

16

We integrate risk-based thinking as part of our QMS, as emphasized in ISO 9001:2015, to identify and address potential risks and opportunities.

17

Our suppliers and partners are actively integrated into our quality management processes, ensuring alignment and quality across the entire supply chain.
