

BSI Training Academy

PAS 1192-5 BIM and Security training course

Essential information about the course

Level 

The construction industry is going through a huge period of change. The drive for faster, more efficient delivery of infrastructure of building projects has never been more challenging. If you are responsible for managing collaborative working and BIM projects/asset management, we can provide you with the core knowledge and skills required to understand and implement security management.

This one day course will help you engage with the security implications arising from BIM Levels 1 and 2.

The course will guide you through the contents of PAS 1192-5 and how security impacts your role, explaining how the components of PAS 1192-5 security mindedness relate to each other. Our expert tutors will make sure you complete the course feeling confident that you can apply your new knowledge as soon as you step back inside your organization.

PAS 1192-5 BIM and Security training course

We want to make sure you have the best learning experience possible. That's why we offer a range of training courses from whether you're new to BIM or looking to demonstrate you're running PAS 1192 compliant projects. We create a positive learning environment so you retain the knowledge and acquire the skills that will continue to be of use beyond the course.

Make sure this is the right course for you

This course is for you if:

- You are a client, designer, construction, commissioning or FM manager who may need to implement security policies, in relation to the built environment

What is the course like?

- One day
- Led by a BSI expert tutor
- Understand the types of security threat to and from built assets and their information
- Recognize security and CDE/BIM Level 1 and 2
- Define the role of security manager
- Appreciate the documentation and execution of policies required for security-mindedness

How will I benefit?

- Recognize threats and sensitive assets
- Apply risk assessment principles to security issues
- Implement security management through information requirements and plans
- Plan the implementation of your security-minded approach to BIM

Why invest in training from BSI?

When you attend a BSI training course, our tutors are the best in the business. They are truly passionate about sharing their knowledge and ensuring you learn. Trusted experts with years of hands-on and business experience, they bring information security to life with relevant and contemporary examples to enhance your learning.

Upon successful completion of your course, you'll receive an internationally recognized BSI certificate.

Training delivered at your site

This could be a convenient and cost effective option, especially if you have multiple delegates.
