

Senior Level

Organizational Resilience Workshop

Empowering leadership teams
with a robust framework for
change

A man in a dark suit and tie is smiling and writing the word "Resilience" in white marker on a whiteboard. The word is large and centered. The background is a blurred office setting.

Resilience

What is it?

BSI, the business improvement company, provides a one day facilitated workshop enabling leaders to identify and prioritize key areas for improvement within your organization. Using a blended approach of academic research alongside innovative new tools and techniques, you will identify where to focus valuable resource to achieve your business goals and strengthen the resilience of your organization in the face of challenging issues or uncertainty.

Who is it for?

The programme suits organizations looking to equip their senior leaders to tackle business challenges so that they can effectively contribute to building an agile, aligned, and resilient organization.

Senior Level

Organizational Resilience Workshop

"We made a very positive step forwards in understanding Organizational Resilience strategies. The robust framework and tools made the task of horizon scanning easier"
CEO, IT Sector

Benefits

Your organization will gain a Leadership Team who can:

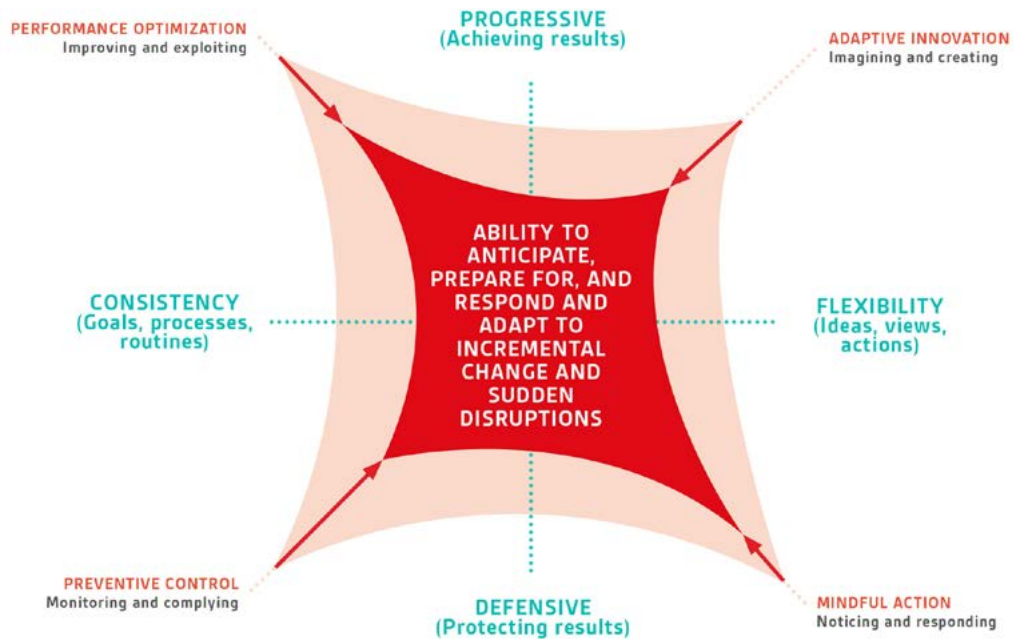

- Understand and identify organizational behaviours required to build resilience
- Benchmark findings to roadmap actions in order to achieve strategic goals
- Identify key elements for success in developing an aligned approach to achieve organizational resilience
- Utilize tools to develop strategic thinking and create a range of strategic approaches to future challenges
- Develop a common platform and capabilities to deal with risk and embrace opportunities with confidence

Methodology

Utilising models developed from the latest research on Organizational Resilience commissioned by BSI with Cranfield University

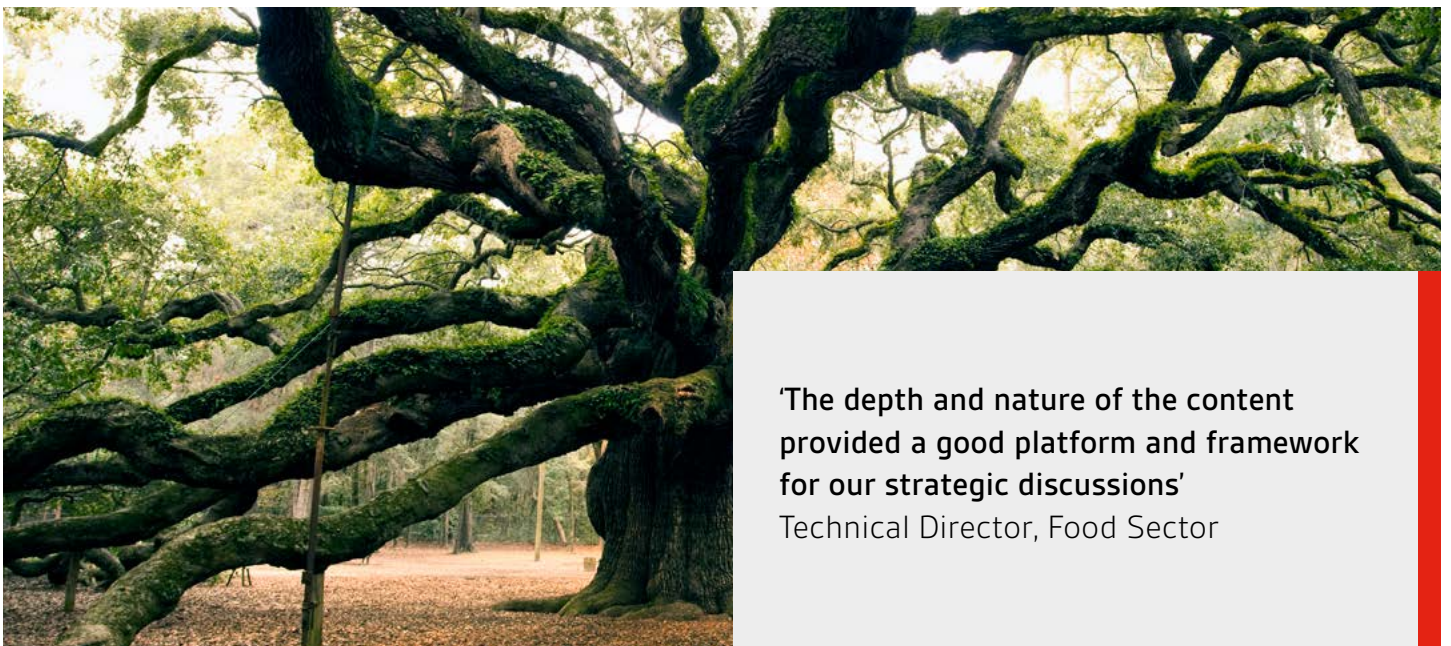

- Complete the BSI Benchmark tool to identify relative strengths and vulnerabilities
- Review & understand the evolution of Organizational Resilience thinking
- Application of Strategic Quadrant Tension and 4sight tools developed from BSI Cranfield management research
- Evaluate and assess responses utilizing BSI Index benchmark research, to diagnose any barriers to strategy execution
- Understand how to apply the key elements organizations should consider in order to be resilient

Senior Level Organizational Resilience Workshop

The Strategic Tension Quadrant

The Strategic Tension Quadrant shows different behavioural characteristics that are associated with different types of strategic activity. Resilient organizations are able to flex and balance these tensions in relation to their current circumstances and are dynamic and agile enough to match the future needs of the organization.
