

Global BIM Manager Professional Training (Top up) for BIM Coordinator

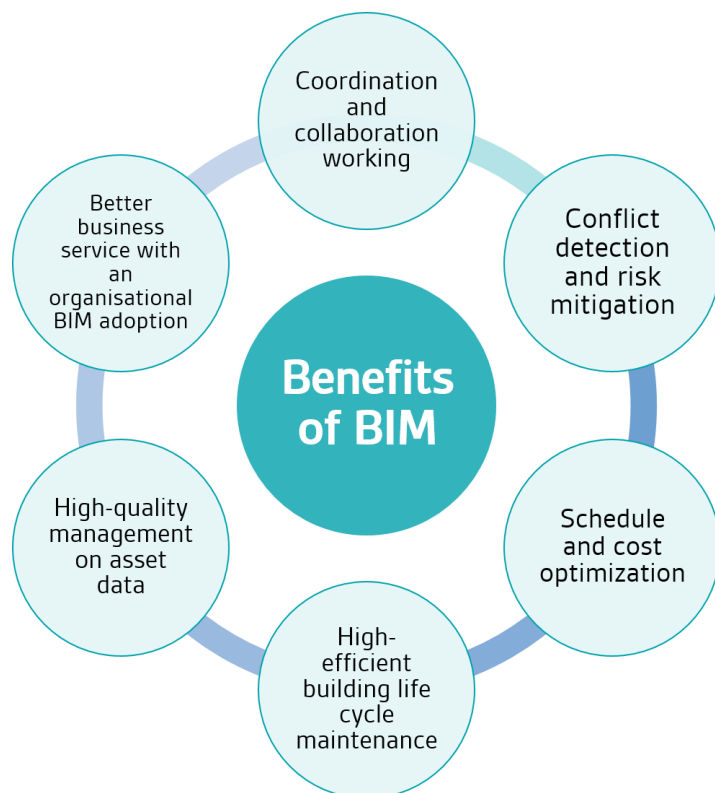

- *Course Brochure* -

WHAT is BIM?

BIM is revolutionizing the way the construction industry creates and cares for its assets around the world. It ensures that everyone in the supply chain; from architects, engineers, constructors and facilities management share information in a collaborative way. It is a new method of construction that delivers major benefits - most notably time and cost savings through building in a collaborative and by managing costs through the whole lifetime of a building. To facilitate the adoption of BIM BSI developed, together with construction industry experts, the UK 1192 series of standards which define BIM Level 2 published in 2013. The ISO 19650 suite of standards moves towards internationalizing these standards.

Since 4 April 2016, BIM Level 2 is mandatory in a government project in UK. The use of BIM is also becoming more commonplace in other countries, such as Singapore, South Korea, Canada and China etc. In Hong Kong, BIM is being implemented in various sectors, such as BIM for Statutory Submissions in Architectural Services Department, BIM for Asset Management in Electrical and Mechanical Services Department, BIM for Utilities Design in Water Supplies Department etc.

In 2017, the HKSAR Government decreed that BIM technology must be used in the design and construction of all major government capital works projects with a project estimate of more than HK\$30 million that were scheduled to start during or after 2018, and that the use of this technology in private construction projects should also be promoted.

In addition, to ensure the healthy development of BIM in Hong Kong, Construction Industry Council (CIC), has introduced the BIM Certification and Accreditation Schemes to ascertain the competency of BIM personnel and the quality of local BIM training courses. To be eligible for certification as a CIC-Certified BIM Manager (CCBM), one of the requirements is the successful completion of BIM Manager course accredited by CIC.

To cope with the surge in demand for BIM personnel and training needs, we are pleased to announce that BSI launches the "Global BIM Manager Professional Training". The purpose of this course is for the preparation of CCBM application and it is the route to be a CCBM. We aim to offer delegates a quality BIM Manager training with the appropriate skill levels and competency in using BIM technology at international standard.

Background of Institution

BSI - Source of the Standards

BSI formulated PAS 1192 standard

The UK currently the region, which sees the fastest growth in the application of BIM. As one of the countries utilizing BIM for many government projects at the earliest, UK not only published various regulations and relevant standards but also issued the mandatory policies in April 2016. During this course, BSI played an important role in BIM standardization pushed by the UK government: in 2014, entrusted by the Construction Industry Council (CIC) of UK, BSI formulated PAS1192 standard.

Meanwhile, BSI also provides the construction companies globally with the standard certification services specific to the BIM competency for project delivery in design and construction stages. In 2016, BSI launched the BIM-related Kitemark. So far, the enterprises which have been certified by BSI Kitemark: Balfour Beatty Plc, BAM Ireland, BAM Construct UK Ltd, Gammon Construction Ltd, Skanska UK Plc and voestalpine Metsec Plc.

WHY should take this course?

BSI develops the BIM management training courses with the purpose of cultivating senior BIM managerial talents who are leading the Architecture, Engineering and Construction (AEC) industry. With the focus of bringing in internationally recognized BIM national standards from the UK into Hong Kong, and with reference to ISO 19650 and PAS 1192 suite standards.

Under the CIC Certification Scheme for BIM Personnel,

- To introduce the lifecycle BIM management experiences and best practices to the AEC industry
- To provide the industry elites with leading-edge learning resources on BIM management
- To improve the core capabilities of BIM management, and ultimately
- To broaden their global horizon regarding the development and contextualising BIM and digital built into the sector

WHO should take this course?

The training course targets, but not limited to:

- CEOs, CFO, CIOs, & COOs
- BIM Managers
- Asset, Engineering, Quality, Facility, Project, Technical Managers
- Real Estate Developers
- Civil, Mechanical and Structural Engineers
- Architects
- Construction Professionals
- Contractors
- Surveyors
- Academia and Government Authorities

From the following industries:

- Government
- Construction
- BIM Consultancy
- Building Materials
- Quantity Surveying
- Project Management
- Architecture
- Real Estate Planning and Development
- Asset Management
- Property and Facility Management
- Green Building Development and Management

Admission Requirement:

Qualification:

A degree in architecture, engineering, surveying, building or construction, or equivalent as recognized by CIC, plus five years of relevant post-degree experience (including at least six months in Hong Kong)

Practical BIM experience:

Graduate of CIC accredited BIM Coordinator course; or
CIC certified BIM Coordinator

Any delegates who are interested in perusing to be a BIM coordinator or Manger in the future.

Policies and procedures for admission:

- Completion of Application Form by internet or hardcopy formats
- Submission of relevant original documents to prove the requirements as stated
- The profile of the applicant will be sent to training operations manager for approval

CITF Fund Claimable

Our course is also registered under the Pre-Approved Lists of Construction Innovation and Technology Fund (CITF). Funding ceiling is **HK\$800,000 per technology**. With the funding ceiling, each person enrolling training is **entitled to 70% of course fee** or HK\$3,000 per course (whichever is the higher).

The course fee is **HKD 2,910 only** (original: HKD 9,700) after CITF reimbursement.

For details of CITF, please refer to CITF website at <https://www.citf.cic.hk/>

WHAT will be taught?

Day 1 (teaching hours: 8 hours)

Topic	How this will help you
<ul style="list-style-type: none"> • Client BIM strategic stage • Client Pre-tender & tender stage • Design Stage • Digital information management 	<ul style="list-style-type: none"> • Information management • Hierarchy of information requirements • BIM activities of Pre-Tender phase • Pre/post appointment BIM Execution Plan (BEP) • Project Implementation Plan (PIP) • Supply Chain Assessment • Procurement Assessment • BIM Execution Plan: Pre and Post appointment Requirements. • BIM Uses: Definition and Design Stage (CIC BIM Standards) • PIM Delivery Data Exchanges and Validations • Level of definition

Day 2 (teaching hours: 8 hours)

Topic	How this will help you
<ul style="list-style-type: none"> • Common Data Environment (CDE) • Construction Stage • Commercial issue • Contract issue 	<ul style="list-style-type: none"> • Role of information management in CDE (setup, assessment and management of CDE) • BIM Execution Planning • BIM value and ROI • Obligations of the project employer and team member • Defining roles, responsibilities and scopes of services

Day 3 (teaching hours: 3 hours)

Topic	How this will help you
<ul style="list-style-type: none"> • Handover stage • Operation & maintenance stage 	<ul style="list-style-type: none"> • As-built information verification • Oversee data transfer from PIM to As-built Information Model (ABIM) and then to Asset Information Model (AIM) • BIM Uses in Handover Stage (CIC BIM Standards) • Updates to the Asset Information Model • Roles, Responsibilities and Authorities for maintaining the AIM • Post Occupancy Evaluation

Certificate

Notes: Trainees will be granted training certificate issued by BSI upon completion of the course and passing the examination.

Training Details

Duration:	3 days, (09:00 – 18:00)
Venue:	23/F, Cambridge House, TaiKoo Place, 979 King's Road, Island East, Hong Kong or Online Virtual Training

Passing Requirements

Passing requirement for the full course: 60% of the total score

- 25% of the daily workshop
- 25% of the assignment
- 50% of the examination

Exam lower than 60% of the total score will be regarded as Fail. One time (only) re-take of the exam can be arranged, Fee: HKD 500.
