ISO 45001 Requirements training course

Essential information about the course

Level 

ISO 45001 is the world's first ISO management system standard for Occupational Health and Safety (OH&S). Its focus on risk prevention, innovation and continual improvement will benefit organizations with the foresight to achieve this global standard through increased organizational resilience. Suitable for organizations large or small and in any industry, it is intended to replace the widely implemented BS OHSAS 18001.

If you are involved in the planning, implementing, or supervising an ISO 45001 management system, then this course will help you to identify the key requirements and

benefits. An excellent introduction to the standard it will help you to manage risks and opportunities, take steps to put health and safety at the heart of your organization and drive continual improvement. You will also learn about the history and development of ISO 45001, key terms and definitions, and the ISO standardized high level structure.

This one-day course is packed with practical activities, group discussion, and classroom learning. Our expert tutors will make sure you complete the course feeling confident that you can apply your new knowledge as soon as you step back inside your organization.

Our full course agenda helps you understand what to expect:

- What is an Occupational Health and Safety Management System (OH&S MS)
- Why an OH&S MS is important to an organization and its benefits
