

# Certified Cloud Security Knowledge (CCSK) training course

## Essential information about the course

Get the skills to manage information security in the cloud with our Certificate of Cloud Security Knowledge training course.

Launched in 2010 by the leading cloud security research organizations, Cloud Security Alliance (CSA) and European Network and Information Security Agency (ENISA), CCSK provides the industry with its first professional certification for cloud security.

Our training course helps you achieve certified status to demonstrate that you're a competent cloud security

professional.

By attending our two-day course you'll get the skills to identify security threats and best practices for securing the cloud. You will also learn how to assess, build, and secure a cloud infrastructure through a series of hands-on/practical exercises.

**Duration: 2 days**

## Course outline

The course is split into six domains that will be covered across two days:

- Module 1. Cloud Architecture
- Module 2. Infrastructure Security for Cloud
- Module 3. Managing Cloud Security and Risk
- Module 4. Data Security for Cloud Computing
- Module 5. Application Security and Identity Management for Cloud Computing
- Module 6. Cloud Security Operations

Upon successful completion of your course, you'll receive a BSI certificate.

To get CSA CCSK Status you will need to successfully complete the CSA CCSK exam to which the voucher will be supplied as part of the course fee and can be booked directly with the Cloud Security Alliance (CSA) on their website

# Certified Cloud Security Knowledge (CCSK) training course

We want to make sure you have the best learning experience possible. That's why we offer a range of training courses from beginner to expert. We create a positive learning environment so you retain the knowledge and acquire skills that will continue to be of use beyond the course.

## Make sure this is the right course for you.

### This is the course for you if:

- You're an information security professional with at least one years' experience in cloud security
- You're looking to gain an internationally recognized qualification

### What is the course like?

- Two days
- You'll receive comprehensive course materials
- Led by a globally recognized tutor
- Interactive and engaging

### How will I benefit?

- Be prepared for the CCSK exam
- You'll have knowledge of critical cloud computing topics including managing cloud security/risk and implementing cloud computing infrastructure security

## Our tutors

With extensive experience in the areas of IT application delivery, IT infrastructure, IT security management, project management and operations management, our tutors boast an extremely strong ability in developing and implementing strategic and tactical efficiency initiatives in all areas of IT management.

All of our tutors are practicing consultants and are recognized as experts in their field.

### Training delivered in-house

This could be a convenient and cost effective option, especially if you have multiple delegates.

**Talk to one of our experts to find out more.**

### Next steps with BSI:

Certified Information Security Manager (CISM®) training  
Certified Information Systems Auditor (CISA®) training  
Certified Information Systems Security Professional (CISSP) training
