

## BSI Training Academy

# BIM BS 1192 Part 4: Handover Information Exchange

## training course

### Essential information about the course

Level 

The construction industry is going through a huge period of change. The drive for faster, more efficient delivery of infrastructure or building projects has never been more challenging. BIM training can help support your strategic direction, prove competency, and embed the knowledge of BIM in your organization. If you require an insight into how to prepare and receiving COBie (Construction Operations Building Information Exchange) deliverables, an understanding of the benefits and how to utilise

these ideas in standards and best practice leading to confidently develop detailed implementation plans, then this course is for you.

Along with an introduction to PAS 1192 and collaborative working, this one day course is designed for those who have some knowledge of BIM Level 2, highlighting the benefits of the UK use of COBie as the digital information exchange between design/supply chain and the client/operator.

### Our course agenda

- Benefits to you, welcome and introductions
- Course aims, objectives and structure
- Background and context
  - Why is COBie important?
  - How did it originate?
  - The role of COBie within your organization
- Scope
  - What can COBie convey?
  - The basic COBie vocabulary
