

PAS 2080:2023

Carbon Management in Buildings and Infrastructure Verification

Client guide to assessment

Demonstrate your commitment to carbon reduction through PAS 2080:2023

Whether you are a designer, constructor, asset owner/ manager or a product/material supplier, PAS 2080:2023 provides a common framework within the built environment sector that helps companies understand and reduce the volume of carbon produced throughout

a project. It encourages organizations to work collaboratively and more effectively by managing the whole life cycle of carbon use, encouraging the creation of a more sustainable way of working.

The benefits include:

Reduced costs – PAS 2080 verification promotes collaborative working. This helps you align processes and offer enhanced service solutions through your supply chain – plus, reducing carbon, reduces cost.

Win Tenders – demonstrating compliance to PAS 2080 not only separates you from competitors but clearly establishes your commitment to carbon reduction and cost efficiency.

Innovate – PAS 2080 encourages innovation by asking adopters to ensure that they are challenging, promoting and innovating lower carbon solutions.

Tackle climate change – the impact of buildings and infrastructure in the UK accounts for approximately 50% of the UK carbon footprint. Play your part in meeting the government carbon reduction targets by obtaining PAS 2080.

How to achieve PAS 2080:2023 verification for carbon management

1 Understand and prepare – download the free PAS and read it; understand the content, your requirements and how it will improve your business.

2 See how ready you are – ensure your organization understands the principles of PAS 2080 and the roles individuals will need to play, and review your activities and processes against the standard.

To help gain practical advice on how to implement the requirements, download the 'Guidance Document for PAS 2080:2023' available online, to help you start your journey.

3 Review and get verified – book your assessment with one of our expert Client Managers for your on-site audit where we'll assess your systems against PAS 2080. The duration of assessment will depend on the size and complexity of your business.

Your journey doesn't stop with verification

We can help you to fine-tune your organization so it performs at its best

- **Celebrate and promote your success** – download and use the BSI Mark of Trust to show you are verified
- **BSI Business Improvement Software** will help you to manage systems and drive performance
- **Consider integrating other management system standards** – such as ISO 44001 Collaborative Working, to help maximize supply chain relationships

Why BSI?

SKANSKA

"PAS 2080 provides a common framework and guidance for the whole value chain to tackle the carbon challenge. It is essential for clients, designers, contractors and suppliers to work together if we are going to drive to drive a low carbon future."

Adam Crossley, Director of Environment

bsi.

"Creating a sustainable way of working in buildings and infrastructure is critical to the future of the built environment sector. PAS 2080 is the clear choice for those considering reducing their carbon footprint and improving the effectiveness of their business."

Victoria Brennan, UK&I Product Certification Director

About BSI

At BSI we create excellence by driving the success of our clients through standards. We help organizations to embed resilience, helping them to grow sustainably, adapt to change, and prosper for the long term. We make excellence a habit.

For over a century, our experts have been challenging mediocrity and complacency to help embed excellence into the way people and products work. We have implemented a built environment sector team of auditors, each with experience within the sector to

ensure you receive comprehensive and value-added audits.

With 80,000 clients in 182 countries, BSI is an organization whose standards inspire excellence across the globe.
