# Cybersecurity and data protection standards ecosystem

International Standards for management systems provide a mode to follow in setting up and operating a management system. This model incorporates the features on which experts in the field have reached a consensus as being the international state of the art. Through the use of the ISMS family of standards, organizations can develop and implement a framework for managing information security, cyber security and data protection controls.

01 Governance, risk and compliance

BS ISO/IEC 27003
ISMS Guidance

BS ISO/IEC 27004
Monitoring, measurement, analysis and evaluation

BS ISO/IEC 27005
Information security risk management

BS ISO/IEC 27014
Governance of information security

BS ISO/IEC 27016
Information security management economics

BS ISO 31000
Risk management

02 Cybersecurity and information security

BS ISO/IEC 27032
Guidelines for cybersecurity

BS ISO/IEC 27002
Information security controls

BS ISO/IEC 27103
Cyber security and information security integration

BS 31111
Cyber risk and resilience. Guidance for the governing body and executive management

03 Data protection

BS ISO/IEC 27701
Privacy information management system

BS ISO/IEC 29151
Data protection controls

BS ISO/IEC 29100
Privacy framework

BS 10012
Personal information management

BS ISO/IEC 29101:2018
Privacy architecture framework

04 Third party risk management

BS ISO/IEC 27036 (Four parts)
Information security for supplier relationships

BS ISO/IEC 28000
Security management systems for the supply chain

05 Cloud

BS ISO/IEC 27017
Security controls for cloud services

BS ISO/IEC 27018
Data protection controls for cloud processors

10 Business continuity

BS ISO/IEC 22301
Business continuity management systems

BS ISO/IEC 27031
ICT readiness for business continuity

09 Incident management

BS ISO/IEC 27035 (Three parts)
Information security incident management

BS ISO/IEC 27043
Incident investigation principles

08 Vulnerability management

BS ISO/IEC 30111
Vulnerability handling processes

BS ISO/IEC 29147
Vulnerability disclosure

07 Application security

BS ISO/IEC 27034 (Five parts)
Application security

BS ISO/IEC/IEEE 15026
Systems and software engineering

06 Network security

BS ISO/IEC 27033 (Six parts)
Network security

BS ISO/IEC 27039
Intrusion detection and prevention systems (IDPS)

Central diagram

01 Governance, risk and Compliance
02 Cybersecurity and information security
03 Data protection
04 Third party risk management
05 Cloud
06 Network security
07 Application security
08 Vulnerability management
09 Incident management
10 Business continuity

BS ISO/IEC 27001
Information security management systems

BSOL can help mitigate cybersecurity risks with standards

With BSOL you can access, view and download data protection, privacy management, cloud assurance and cybersecurity standards with multiple user access, across multiple sites, facilitating the distribution of the knowledge across your business.
