Benefit from integrating your management systems

Start now with PAS 99, BSI's world-class framework

bsi.

...making excellence a habit.™

Improve efficiency by integrating your management systems with PAS 99.

The more management systems you have in place, the more your business will benefit. And now you can take the hard work out of managing more than one certified system at the same time, and without investing extra time and money. PAS 99 allows you to streamline the way you operate, align all common standard requirements and cut the cost of separate audits and administration. PAS 99 is the world's first specification for integrated management systems.

Many of our customers asked for one framework to manage all of their certified systems. So we developed PAS 99 using the ISO guide for writing management systems standards – giving you a world-class framework to work with.

The purpose of an integrated system is to align common standard requirements and provide a holistic picture of a business, thereby cutting the cost of separate audits and administration and facilitating the adoption of new management system standards.

The benefits our certified clients have enjoyed speak for themselves:

Risk management

Integration makes it easier to compare risks arising from different impacts allowing better prioritization of issues and allocation of resources

Cost and resource savings

Reduced number of audits due to holistic management structure leading to less duplication of procedures and administrative tasks

Financial performance

Increased profitability due to lower costs, improved productivity, risk control and creativity

PAS 99

Streamlined business operations

'One' management system in place encourages a more streamlined approach to business objectives resulting in quicker decision making and less conflict between business systems

Corporate reputation

Enhanced competitiveness and business security as the direction, control and guidance of the organization is improved

Improved communication

Enhanced communication through simplicity and uniformity of management structure. Improved management and process transparency leading to more efficient and effective management review, action planning and employee participation

> "Having management systems in place gives the customers the confidence that the company have the controls in place to provide continuity, good quality and service at the same time as looking after its people and the environment."

Stuart Coomber
Managing Director, Laminar Medica

A guide for your PAS 99 journey with BSI

	Understanding		Implementing the solutions		Getting certified		Making excellence a habit
Step	Information gathering	Calculating the benefits	Preparing the organization	Putting together an implementation plan	Running the system	Proving it's working	Looking for opportunities for continual improvement
Actions	Understand the standard, certification and your business requirements	Understanding how protecting business information will benefit your business	Train your team, ensure the organization understands the principles and review current business practice	Compare your activity with PAS 99 requirements, then prepare a gap analysis report	Review the system to ensure it meets the standard's requirements	BSI will carry out a system and document assessment plus a system effectiveness assessment	Celebrate and promote your certification, then review the systems and processes

Why BSI?

We know PAS 99; BSI shaped the original specification

BSI developed PAS 99 using the ISO guide for writing management systems standards and continues to lead its development. We are the number one certification body in the UK, USA and Korea.

With over 73,000 clients in 150 countries, BSI is the business standards company that helps organizations make excellence a habit – all over the world. That's our business, enabling others to perform better.

Clients benefit from the most highly trained and knowledgeable assessors in the industry. They will ensure your staff are competent and fully able to implement best practices that are tried and tested.

Our clients range from top global brands to small ambitious businesses. Our people have understood their challenges, and see the opportunities to share learnings.

We talk with, and listen to clients every day, via our 'Voice of the Customer' survey. We ask them what they want and how satisfied they are with our products and services, so that we make sure we are meeting their expectations and giving them the opportunity to tell us their thoughts.

Save money and resources by integrating with BSI.

PAS 99 is right for you if you have two management systems in place or more and you don't have to have been certified by BSI before.

It's also not important whether you've tried integrating them previously; we have the right training and resources to suit your level of experience.

BSI can support you all the way along this journey – through training, independent assessment and software solutions. Our Entropy™

software is a powerful management solution that significantly reduces the cost and effort needed to proactively manage your management systems.

Typical integrated management systems might include:

Quality management ISO 9001 `STC`
Environmental management ISO 14001 `STC`
Occupational Health and Safety ISO 45001 `STC`
Information Security Management ISO/IEC 27001 `STC`
IT Service Management ISO/IEC 20000 `STC`
Food Safety Management ISO 22000 `STC`
Business Continuity Management ISO 22301 `STC`

Key: Standard `S` Training `T`
Certification `C`

But, integrating is not limited to just these standards. Talk to one of our advisors today about your goals, or visit www.bsigroup.com to find out more about integrating your systems.
