Artificial Intelligence | ISO/IEC 42001:2023 Implementation

International Training

Number of days   **2**

Course descriptive

Improve and protect your organization, share knowledge of AI management and build stakeholder confidence with our ISO/IEC 42001 Implementation Training Course – and gain the expertise to put in place a robust and quality artificial intelligence management system (AIMS).

We deliver a globally recognized certification that gives you the skills framework to manage your organization's data and maintain best practice in artificial intelligence management. This will incorporate each stage from scoping your policy needs to evaluating risks and building organization awareness, and on completion of this training course you can play a key role in ensuring your organization is ISO/IEC 42001 compliant.

International Training **ISO/IEC 42001:2023 Implementation**

Pedagogical objectives

You will develop an understanding of how ISO/IEC 42001 can provide a systematic framework to improve overall organizational performance when managing information.

Upon completion of the course, you will appreciate how consistent and predictable results can be more effectively and efficiently delivered by the promotion/application of the process approach, within ISO/IEC 42001, and how this help in meeting requirements.

Risk-based thinking has been included in the requirements of ISO/IEC 42001, and you will benefit from an understanding of this approach; especially when defining the rigor and degree of formality needed to plan and control an AI management system.

You will also be able to recognize the new harmonized approach, developed by ISO, to improve alignment among its International Standards for management systems.

Skills to be acquired

Upon completion of this training, you will be able to:

- Explain key elements of a management system implementation process

- Identify a typical framework for implementing ISO/IEC 42001 following the PDCA cycle

- Conduct a base line review of the organizations current position with regard to ISO/IEC 42001

- Interpret the requirements of ISO/IEC 42001 from an implementation perspective in the context of their organization

- Implement key elements of ISO/IEC 42001

Targeted audience

- Those who will be involved in advising top management on the introduction of ISO/IEC 42001 into an organization

- Designed for those with artificial intelligence responsibility

- Those planning to implement a system or new to managing a system

- Anyone working with AI management, including consultants

Pedagogical, technical and framing means

Course materials including :

- Introduction to the training, detailed program and security assignments

- Course presentation, theory and activities/ role plays

- Answers to the activities

- Videos

- Additional documents, distributed during the sessions, to use for the activities

- Attendance sheet to be signed

Assessment specifics

- Questionnaire to assess the knowledge at the end of the training

- Customer survey

What is included?

- Course materials, provided electronically

- Letter of attestation

- Official certificate
