

HDS CERTIFICATION : YOUR STEPS

Study of the HDS certification project with validation of the scope

DEFINITION

1

Discussion with the HDS project manager, your key contact at BSI.

Participation in training courses dedicated to HDS certification

TRAINING

2

Optional but highly recommended, HDS courses allow you to be effectively prepared before certification.

Implementation of your ISMS compliant to the HDS framework

IMPLEMENTATION

3

The ISMS implementation average duration is 9 months. You will then be able to realise a pre-audit with your BSI Client Manager.

Completion of the documentary audit and the compliance audit

AUDIT

4

At the end of these audits will be pointed out possible minor / major non-conformities. An action plan will have to be set up to correct them.

Independent verification review of the audit compliance

TECHNICAL REVIEW

5

Last step before the certification, BSI executes an overall review of all elements of the audit.

Issue of your Healthcare Data Storage Certificate

CERTIFICATION

6

Communicate about your certification through a certificate award ceremony or case study.
Next deadlines: continuous assessment visit 1, continuous assessment visit 2 and recertification.
